

Uzair Riasat

Full Stack Web Developer · Python / JavaScript / Next.js / MySQL / Frappe · AI-Powered Applications

Islamabad, Pakistan · +92 301 8759589 · uzairriasat510@gmail.com · linkedin.com/in/uzair-riasat-b714002a3 · uzairriasat.netlify.app · github.com/UzairRiasat

Full-stack web developer building complete applications — Python backends, JavaScript frontends, and Frappe systems — at MicroMerger and independently. Owns the full delivery cycle: UI implementation, API design, and code review, coordinated with cross-functional teams via Trello and Ajera.

SKILLS

Backend: Python, FastAPI, Frappe / ERPNext, ERP Systems, MySQL, API Architecture

Frontend: JavaScript, Next.js, TypeScript, React

Full-Stack Delivery: Git, Code Review, Postman

AI / LLM Integration: OpenAI API, Prompt Engineering, GPT-4o, LangGraph

AI Dev Tools: Cursor, GitHub Copilot, Claude

Deployment & Tooling: Render, Netlify, Trello, Jira, GitHub Actions

EXPERIENCE

Software Engineer · MicroMerger (Pvt.) Ltd.

Islamabad, Pakistan · Jul 2025 – Present

- Backend and full-stack developer on Frappe-based Python systems for enterprise clients — internal workflows, data integration, and reporting.
- Built and maintained Frappe-based API services and data flows to move data between projects and import Excel records programmatically.
- ~30% faster API response times — restructured MySQL schemas and rewrote query logic.
- Built interactive dashboards (Highcharts) for operational and program data, including UNICEF-supported public sector monitoring.
- Modified modules such as accounting to match client requirements, with custom workflows and reporting.
- Coordinated sprints and delivery tracking across developers, analysts, and PMs using Trello and Ajera.

Web Development Intern · IBDA

Islamabad, Pakistan · Remote · Aug 2024 – Dec 2024

- Front-end web development internship using JavaScript, React, and Next.js. Built responsive UI and collaborated with developers on custom software delivery.

Cloud Applied Generative AI Engineer · PIAIC

Islamabad, Pakistan · Feb 2023 – Dec 2024

- Built and deployed AI agents with the OpenAI API on real document and workflow use cases (including LangGraph for multi-step flows).
- Improved answer reliability with RAG pipelines that ground LLM responses in structured knowledge.
- Shipped two publicly deployed tools — a live portfolio AI assistant and a document extraction API.

PROJECTS

Portfolio Website · Next.js · FastAPI · OpenAI API · Netlify · Render · 2024

Full-stack portfolio with a live AI agent — Next.js frontend and FastAPI backend for contact form and agent logic.

Document Processing Agent · FastAPI · OpenAI API · Render · 2026

Converts unstructured PDFs/DOCX into validated JSON via Extractor → Validator → Clarifier agentic loop.

E-commerce Platform · Python · FastAPI · MySQL · 2025

Structured learning project to Frappe standards — product catalog, cart/checkout, order tracking, and CRM.

EDUCATION & CERTIFICATIONS

BSc Business & Information Technology · Virtual University of Pakistan · 2023 – Present

Computer Software Engineering · PIAIC · Sep 2023 – Present

Certified Cloud Applied Generative AI Engineer · PIAIC · 2023
