

Uzair Riasat

Backend Engineer · Python & FastAPI · AI Agents & LLM Systems · ERP

Islamabad, Pakistan · +92 301 8759589 · uzairriasat510@gmail.com · LinkedIn · Portfolio · GitHub

Backend and AI engineer with production experience in Python and FastAPI — shipping APIs, ERP systems, and LLM-powered tools at MicroMerger and through PIAIC. Achieved ~30% reduction in API response times through schema restructuring and query optimisation. Built AI agents and RAG pipelines with the OpenAI API (LangGraph for multi-step flows where needed). Full delivery cycle: design, code review, CI/CD, testing, and production.

SKILLS

Backend: Python, FastAPI, REST API Design, ERP Systems, MySQL, API Architecture

AI / LLM: OpenAI API, AI Agents, RAG Pipelines, Prompt Engineering, GPT-4o, LangGraph

Frontend: React, Next.js, TypeScript, Tailwind CSS

Engineering: Git, Code Review, Unit Testing, CI/CD (GitHub Actions)

Tooling & Deploy: Trello, Jira, Postman, Render, Netlify, GitHub Actions

EXPERIENCE

Software Engineer · MicroMerger (Pvt.) Ltd.

Islamabad, Pakistan · Jul 2025 – Present

- ~30% faster API response times — restructured MySQL schemas and rewrote query logic across ERP and web application endpoints.
- Shipped production-grade FastAPI / Frappe services covering inventory, order processing, and internal workflows under code review.
- Automated internal deployment workflows using GitHub Actions, reducing manual release steps and catching regressions before production.
- Coordinated sprints and delivery tracking across developers, analysts, and project managers using Trello and Ajera.

Web Development Intern · IBDA

Islamabad, Pakistan · Remote · Aug 2024 – Dec 2024

- Front-end web development internship using JavaScript, React, and Next.js. Built responsive UI and collaborated with developers on custom software delivery.

Cloud Applied Generative AI Engineer · PIAIC

Islamabad, Pakistan · Feb 2023 – Dec 2024

- Built and deployed AI agents with the OpenAI API on real document and workflow use cases (including LangGraph for multi-step flows).
- Improved answer reliability with RAG pipelines that ground LLM responses in structured knowledge.
- Shipped two publicly deployed tools — a live portfolio AI assistant and a document extraction API.

PROJECTS

Document Processing Agent · FastAPI · OpenAI API · Render · GitHub Actions · 2026

Converts unstructured PDFs/DOCX into validated JSON via Extractor → Validator → Clarifier loop. CI/CD and keep-alive workflows on Render.

Portfolio AI Assistant · Next.js · TypeScript · OpenAI API · Netlify · 2024

Live AI assistant for visitor queries — prompt layer, conversation memory, and frontend as one integrated system.

E-commerce ERP Backend · Python · FastAPI · MySQL · 2025

Inventory, orders, and CRM modules with normalised schemas and independently scalable architecture.

EDUCATION & CERTIFICATIONS

BSc Business & Information Technology · Virtual University of Pakistan · 2023 – Present

Computer Software Engineering · PIAIC · Sep 2023 – Present

Agentic AI Development · PIAIC certification
