

Uzair Riasat

Full Stack Web Developer · Python / JavaScript / Next.js / MySQL / Frappe · AI-Powered Applications

Islamabad, Pakistan · +92 301 8759589 · uzairriasat510@gmail.com · [linkedin.com/in/uzair-riasat-b714002a3](https://www.linkedin.com/in/uzair-riasat-b714002a3) · uzairriasat.netlify.app · github.com/UzairRiasat

Full-stack web developer building complete applications — Python backends, JavaScript frontends, and Frappe systems — at MicroMerger and independently. Owns the full delivery cycle: UI implementation, API design, and code review, coordinated with cross-functional teams via Trello and Ajera.

SKILLS

Backend: Python, FastAPI, Frappe / ERPNext, ERP Systems, MySQL, API Architecture

Frontend: JavaScript, Next.js, TypeScript

Full-Stack Delivery: Git, Code Review, Postman

AI / LLM Integration: OpenAI API, Prompt Engineering, GPT-4o

AI Dev Tools: Cursor, GitHub Copilot, Claude

Deployment & Tooling: Render, Netlify, Trello, Jira

EXPERIENCE

Software Developer — Backend & Full Stack · MicroMerger *Jan 2025 – Present*

- Backend and full-stack developer on Frappe-based Python systems, working on internal workflows, data integration, and reporting for enterprise clients.
- Built and maintained Frappe-based API services, and built data flows to move data between projects and import records from Excel into the system, mapping and inserting each entry programmatically.
- ~30% faster API response times — restructured MySQL schemas and rewrote query logic.
- Built interactive dashboards (Highcharts-based) visualizing operational and program data for internal and client-facing use, including provincial and national polio-related monitoring dashboards for UNICEF-supported public sector initiatives.
- Modified modules like accounting to match client-specific requirements, implementing custom workflows and building accounting reports.
- Coordinated sprints and delivery tracking across developers, business analysts, and project managers using Trello and Ajera in an Agile environment.

PROJECTS

Portfolio Website · Next.js · FastAPI · OpenAI API · Netlify · Render · 2024 ↗ [Live](#)

Full-stack portfolio site featuring a live AI agent — a Next.js frontend integrated with a FastAPI backend that powers the contact form and AI agent logic, deployed independently with the frontend on Netlify and the backend on Render.

Document Processing Agent · FastAPI · OpenAI API · Render · 2026

Converts unstructured PDFs/DOCX into validated JSON via an agentic Extractor → Validator → Clarifier loop built with FastAPI and the OpenAI API. Deployed on Render.

E-commerce Platform · Python · FastAPI · MySQL · 2025

Structured learning project built to Frappe standards — product catalog, cart and checkout flow, order tracking, and CRM modules, backed by normalised schemas across inventory, orders, and customer data.

EDUCATION & CERTIFICATIONS

BSc Business & Information Technology · Virtual University of Pakistan *2022*

Certified Cloud Applied Generative AI Engineer · PIAIC — Presidential Initiative for AI & Computing, Pakistan

2-year programme in generative AI, cloud, and applied ML *2023*
